Amaipur Miloni High Madrasah   **Amaipur, Birbhum 2019**
Higher Secondary (WBBME)   *Percentage: 73.12%*

Work Experience

Indomitech Group – Frontend Developer: Aug 2022 – Jan 2024

- Developed Indomitech Group's Official website, driving a 20% increase in engagement.
- Created 15+ user-friendly responsive front-end websites.
- Completed a fully functional e-commerce site with 30+ features.
- Collaborated on 20% of server-side logic with backend developers.
- Worked with international clients on various projects and delivering exceptional results.

Projects

CountryX (Github: **Source Code**)

- Developed a web application featuring an extensive list of over 150 countries.
- Integrated with the REST Countries API to retrieve and display data.
- Integrated a powerful user search functionality for efficient access to detailed information on over 150 countries.

EvPoint (Github: **Source Code**)

- Created a web app with integrated interactive maps using Leaflet.js in 2022 in just 7 days.
- Implemented a global map, showcasing electric vehicle charging points (with current location and navigation).
- Integrated search functionality, empowering efficient location of specific charging points.

Bankist (Github: **Source Code**)

- Implemented a security-enhanced feature: automatic logout after 5 minutes.
- Enabled seamless money transactions feature for users with 10 free-of-cost transactions.
- Implemented a loan feature with a logical limit set at 3% of the current account balance.

Technical Skills

- **Programming Languages:** Proficient in Core Java, C, Python, and JavaScript, with strong skills in object-oriented programming, algorithm development, and problem-solving using data structures and algorithms (DSA).
